

THIRD ANNUAL RESTRUCTURING DAY

May 28 | 2024

Building on the success of previous years' events in 2022 and 2023, this event brought together esteemed experts in the fields of restructuring and insolvency to discuss the latest developments in these fields and their impact on business. It has already built a tradition among AmCham Slovakia members, who appreciate latest updates and the unique possibility to consult with experts on these issues.

and disadvantages of pre-pack sales models, their key settings, as well as their incorporation in the existing types of procedures in Slovakia and the Czech Republic. Experts on the topic of restructuring and insolvency explored all the legal and business aspects relevant for business owners. Two expert panel discussions dissected the proposed European directive on the harmonization of insolvency law and its implications.

This year's edition - the Third Annual Restructuring Day, took place at Jurkovičova tepláreň in Bratislava and it was focused on the advantages

UNMASKING AND DEFEATING DEEPPFAKES & DIS-INFORMATION

June 24 | 2024

One of the topics that AmCham Slovakia's Digital Committee is following with special attention this year is cybersecurity and the latest trends and developments in this area. In line with this focus - this event delivered an eye-opening overview of the dangers of deepfakes and disinformation, highlighting specific examples of how they can damage personal and business reputations and cause significant financial losses. Deepfake technology is evolving rapidly, enabling capabilities that were hard to imagine just a few years ago. This underscores the importance of being aware of the current dangers and

knowing how to prevent them.

However, as the panelists stressed, being aware of the dangers doesn't mean being scared or ignoring the benefits offered by the same technologies. The future of AI lies in our hands, there will always be new threats and our best strategy is to keep educating ourselves on the existing risks as well as on the ethical aspects and values. It is up to us to use the potential of AI to the benefit of mankind - that was the main message of this business seminar.
