

Liliana Rástocká

Senior Policy Advisor, EU Regulations & Funding, Green Energy, Environmental Policies & Healthcare at PA Matters

Mission Statement:

For Slovakia's long-term sustainability and economic growth, I share AmCham's commitment to advancing sustainable business practices and see the ESG Committee as a key platform to drive this agenda.

My vision is to amplify the committee's efforts in 2026 by delivering an actionable ESG strategy, supporting members with onboarding and financing their initiatives, ensuring their voice is well represented in governmental ESG policy-making, and aligning ESG adoption at both the business and societal levels.

Strategically, I would focus my contribution on four pillars: energy and emissions, green finance, circularity, and biodiversity and climate. Using targeted events, peer learning and policy dialogue, and drawing on my experience across ministries, the regulatory office, NGOs and advisory roles, I aim to turn these pillars into practical tools and opportunities for growth and resilience for AmCham members and mobilise resources for projects that benefit companies, society and the environment in Slovakia.
