

Nikol Kubaská, JUDr., MPH

HealthCare Policy & Communication Lead MSD Slovakia

Mission Statement:

I am applying for the leadership role in the Healthcare Committee of AmCham Slovakia because I believe in the power of collaboration to drive meaningful change in the healthcare sector.

With my deep experience in healthcare policy, medical law expertise, I have developed a strong understanding of how strategic dialogue between stakeholders can influence better health outcomes and foster innovation.

Healthcare is undergoing rapid and dynamic transformation in Slovakia - shaped by technological advances, regulatory, legislative and financial shifts, evolving patient needs too.

It is essential that the HealthCare Committee reflects these changes and acts as a proactive platform for shaping sustainable, future-ready solutions.

As the largest committee within AmCham Slovakia, where I am standing more than 12 years, the Healthcare Committee carries a unique responsibility to lead by example, amplify impact, and ensure that diverse voices from across the ecosystem are heard.

My goal is to contribute to shaping a transparent and resilient healthcare environment by promoting evidence-based policies, supporting digital transformation, and encouraging partnerships between the public and private sectors.

Joining the leadership team will allow me to leverage my professional expertise, network, and commitment to advocate for improvements that benefit members of Healthcare Committee, patients and the broader credible community.

I see this as an opportunity to make a tangible impact and strengthen AmCham's role as a trusted partner in times of healthcare reforms.

Thank you for your trust.
