

# THE CHALLENGES IN CYBERSECURITY

July 9 | 2024

In collaboration with the Slovak National Security Authority and the Ministry of Foreign and European Affairs of the Slovak Republic, AmCham Slovakia organized a conference in Brussels focused on the pressing challenges in cybersecurity. This half-day event provided a valuable platform for connecting policymakers, industry leaders, and academics who are shaping the future of cybersecurity policy and practice. The program addressed a wide range of issues, covering the full spectrum of cybersecurity concerns, regulatory frameworks, and technological innovations across

Europe and the United States. Two expert panel discussions delved into critical questions: Should technology regulation in cybersecurity be light or heavy-handed? Where would legislation prove more effective, and where could strategic guidelines be more appropriate? What are the key transatlantic differences, and how can we leverage potential synergies in dealing with adversarial actors?

This conference highlighted the complexity of modern cybersecurity challenges and the need for continued collaboration between key stakeholders across sectors and borders.
