

SPECIAL EVENT

Election Night

AmCham's Election Night at the elegant Berlinka gallery café & bistro offered a unique opportunity to await the results of Slovakia's 2020 Parliamentary elections in a unique atmosphere and company. The guests enjoyed live musical sets by Peter Bulík & Oto Váhovský band as well as the special Google Arts & Culture corner with the option to create an art selfie or try painting in 3D space with virtual reality using Google's Tilt Brush.

Before the first exit polls were made available, the program featured an interesting panel debate focused on Slovakia's potential in the digital economy. The late night analysis of exit polls put the preliminary results into a wider context of Slovakia's future development, the potential priorities of the new government and the impact of this change on the business environment. All in all, it was a night full of interesting discussions, hopes, aspirations and several surprises.

BUSINESS BREAKFAST

Automation Anywhere: The next generation of RPA

Robotic Process Automation (RPA) belongs among the cutting-edge technologies characteristic of Industry 4.0, in fact it is widely considered as one of its main catalysts. This business breakfast, held in the inspiring premises of HubHub, turned the future potential of RPA into the present by demonstrating how to build, scale and operate digital workforce. It introduced Automation Anywhere's brand new A2019, a web-based and cloud-native RPA platform for automating business processes.

The interactive session with two automation professionals, Jonas Knoll and Davit Tonoyan of Automation Anywhere, explored some of the most fascinating aspects of Intelligent Automation through the eyes of business, IT and developers. The expert speakers shared their experience regarding RPA's potential to accelerate collaboration between business and developers, or how to effectively introduce RPA into business operations.
