

FORD: GREEN LIGHT FOR INNOVATION

THE MOST AFFORDABLE PLUG-IN HYBRIDS ON THE SLOVAK MARKET

Ford plug-in hybrids combine the best advantages of electric and internal combustion powertrains. The innovative Ford Tourneo Custom® and Ford Kuga® provide a quiet and dynamic driving experience while being kind to your wallet and the environment. In short, they offer the best of both worlds.

What benefits do you gain by adding them to your company fleet? You receive high performance, excellent fuel economy, tax and accounting advantages totaling thousands of euros, along with the satisfaction of contributing positively to the environment.

Increasingly popular company vehicles include the Ford Tourneo Custom®, which can comfortably carry up to nine passengers. A longer business trip? No problem, this all-rounder can cover 50 kilometers of pure electric power, while its combined fuel consumption of 1.7 liters per 100 kilometers is among the best in class.

The Ford Tourneo Custom® comes standard with parking sensors, a camera, full LED headlights, alloy wheels, and a heated windscreen. These premium features ensure that passengers feel comfortable throughout the entire journey, no matter the destination. In terms of towing capacity, the Ford Tourneo Custom® is class-leading, able to handle a trailer with a maximum

weight of up to 1,850 kilograms. However, you may be intrigued by what is clearly the most affordable PHEV SUV on the market. That title goes to the Ford Kuga®, which has become the best-selling plug-in hybrid across Europe for three consecutive years. Few SUVs better combine the best of both electric and internal combustion powertrains.

AmCham members can take advantage of an exclusive, limited-time offer.

Under the bonnet, it hides up to 243 horsepower and a reliable 2.5-liter internal combustion engine mated to a superb CVT continuously variable transmission. On a single charge, it offers an excellent 88 kilometers of range in city driving under electric power. It will undoubtedly impress with a combined consumption of just 0.9 to 1.2 liters per 100 kilometers of driving. Not to be outdone, the Ford Kuga® also boasts the largest towing capacity in the segment, handling up to 2,100 kilograms of attached weight.

THE MOST FLEXIBLE VAN ON THE MARKET

Combining sustainable operations with high

efficiency in a corporate fleet doesn't have to take long. The Ford E-Transit® all-electric van is a great example.

Powered by a 400V battery pack with a usable capacity of 89 kWh, it lends the vehicle a range of up to 402 kilometers on a single charge. If you often need to transport cargo over longer distances, you've just found a flexible and environmentally friendly solution.

The versatility of the Ford E-Transit® lies in the available configurations. Need an open chassis with a single cab to carry larger loads? Make more use of an enclosed van? Choose from three lengths and two heights. The choice is yours.

A STYLISH SUV WITH AN IMPRESSIVE RANGE

Looking for a representative and innovative SUV for your corporate fleet? Ford offers several all-electric, electrifying alternatives. The stylishly elegant Ford Puma Gen-E® offers an impressive city range of up to 523 miles. Ultra-fast charging from 10% to 80% in a whopping 23 minutes allows for dynamic use even on a trip abroad. You'll also be delighted with the most significant boot space in the class - up to 566 liters, thanks to the innovative GigaBox in the boot and an additional storage box under the bonnet. Work tools or tools can thus be transported without the slightest difficulty.

With a maximum range of up to 602 kilometers, the iconic Ford Explorer® is also

Ford has been a global leader in the automotive industry for over a century, driving the shift toward clean technology. Its lineup of plug-in hybrids and all-electric vehicles offers exceptional performance, innovative features, and benefits for both finances and the environment.

ideal for longer business trips. With this range and a power output of over 200 kW, it is the most affordable SUV on the market. It can cover up to 192 kilometers of driving in 10 minutes of charging, so you're ready to go virtually all the time. The innovative Assist suite includes up to 12 ultrasonic and three radar sensors, which, together with the five cameras, have one mission: to ensure a safe and smooth ride.

LEGENDS ON THE ROAD

A technology-filled legend, that's how we could redefine the Ford Mustang Mach-E®. It merges cutting-edge innovations with exceptional fuel efficiency and eco-friendly driving.

With a maximum electric range of up to 600 miles and zero emissions, it's one of the most powerful and greenest SUVs ever. If you care about the environment, the Ford Mustang Mach-E® is the perfect candidate. You can quickly charge it from 10% to 80% in 38 minutes. This is the epitome of electric freedom.

The all-electric Ford Capri® coupe-style SUV is a fitting tribute to the 1960s legend. With sleek design, sporty performance, and modern technology, it fulfills the dreams of motorists and professional drivers alike.

You'll be hard-pressed to find better value for money among SUVs. Thanks to its extended-range battery pack, the Ford Capri® can travel an impressive 627 miles on a single charge. A nice bonus is up to 572 liters of boot space.

AN ESG STRATEGY WITH IMMEDIATE FINANCIAL BENEFITS

Incorporating fully electric vehicles and PHEVs into your company fleet can save up to €10,225 in tax and levy liabilities over four years. Along with consistently low energy consumption and an extended 5-year warranty, this offers the most economical fleet solution available. Ford stands for sustainability on four wheels without any compromise on performance.

All the vehicles listed here offer the best-in-class standard equipment with minimal or zero emissions. AmCham members can take advantage of an exclusive, limited-time offer featuring special pricing and terms on new models.
