

Where are you heading, Slovakia? or Slovakia 25 years from now

by  **Vladimír Kaštier**,
Manager,
Ernst & Young, s.r.o.

An EY survey, mapping the visions of entrepreneurs, employees and students for the future of the Slovak Republic.

66% 

According to two-thirds of the respondents, it will no longer be necessary to visit public authorities in person.

71% 

Schools will still be attended, but 71% of respondents consider that methods of teaching will change. Every tenth respondent thinks that teaching will be solely online.

3% 

Only a negligible proportion (3%) of those surveyed think that we will still use cash 25 years from now.

75% 

More than two-thirds of respondents think that artificial intelligence will replace some professions.

“Companies are already aware of how the emerging trend of robotics is improving the efficiency of work. Robotics is a topic in which we have been engaged intensively. Companies have grasped this growing trend towards increased efficiency of work, with a relative decrease in production and overhead costs. Also, our survey shows that this technological revolution is well-founded and everybody – entrepreneurs, employees as well as students – should get prepared for it.”

PETER MÁLIK,
Partner of EY's Advisory
Services and IT Advisory

The greatest political and economic impact on Slovakia in 2042.

39% 

Four in ten surveyed Slovaks (39%) think that the automotive industry will continue to be the driving force of the Slovak economy in 25 years' time.

72% 

According to almost three-fourths of the survey respondents, the euro will continue to be Slovakia's currency in 2042.
